Older models aid Apple's India biz

India business nearly doubled during Dec quarter: CEO

Prasid Banerjee & Abhijit Ahaskar

NEW DELHI

Driven by older iPhone models such as the iPhone SE 2020, iPhone 11 and iPhone XR, Apple's India business almost doubled during the December quarter, said industry analysts. "There are certain markets where our share is quite low. India is one of them. It did improve from the year-ago quarter. Our business roughly doubled. So, we feel pretty good about the trajectory," Apple chief executive Tim Cook said in an earnings call on Wednesday night.

"Last quarter was the first full quarter of the online store, and that has gotten a great reaction to it and helped us achieve the results that we got. We're also going in there with retail stores in the future, and we look to that to be a great initiative," Cook added.

Experts said Apple's market share in India grew from 2% in December quarter 2019 to 4% in 2020. According to Prachir Singh, senior research analyst, Counterpoint Research, over 50% of the sales were driven by older iPhones. The iPhone SE (2020) accounted for 30% of the com-

Last quarter was the first full quarter of the online store, and that received great reaction, said Apple CEO Tim Cook. BLOOMBERG

pany's shipments, followed by iPhone 11 (27%) and iPhone XR (14%). The rest was accounted for by iPhone 12 series, which arrived late last year, he added.

Apple has been cutting the prices of its older iPhones following the launch of new mod-

els for a few years, which helped it increase its market share in India, where iPhones are still an aspirational product. "Lower iPhone price has put them within the reach of a lot more people in India," said Rushabh Doshi, research director, Cana-

lys. "With the new pricing strategy, they've started eroding market share of Samsung. Also, the premium Android segment has become a sea of sameness now. Earlier Sam-

sung was alone. Now there is Oppo, Vivo and Xiaomi in their segment. That is where Apple gets a one up."

Doshi said the allure of Apple is "stronger" now since it's no longer out of reach for the more affluent middle class. "What also helped is that Amazon and Flipkart ran their Apple Day sales and they were much more beneficial to Apple than their own online store," Doshi said.

India has become a growing market for Apple over the past year. In the September 2020 quarter, Apple posted strong growth, even as iPhone sales fell globally. Apple didn't disclose the exact revenue numbers for India in July-September, but its revenue from Asia Pacific, excluding China, grew 10% over the year. The December quarter saw APAC revenue grow 11% to about \$8.2 billion. prasid.b@livemint.com

One last exploration of four days here on Earth and I'll stop. Well, for now.

What actually counts as a day, on our planet? 24 hours, you say. That's right, but it's really an approximation, not a definition. The way we define a day is by the rotation of the Earth. A day is the time it takes to spin on its axis exactly once. That's very close to 24 hours, which is why we use that number. But it's worth remembering two things about that: yes, it isn't exactly 24 hours, and the length of the day changes all the time. That is, the Earth spins faster sometimes, slower some other times. Faster rotation gives us a shorter day; slower rotation makes it longer.

By "day" here, incidentally, I don't necessarily refer to the stretch of clock time between sunrise and sunset, meaning the daylight hours. I mean instead what I mentioned briefly in my last column: the time from one solar noon to the next. That's close to 24 hours. And naturally, that length of time varies with the speed of the planet's rotation.

All of which is not to suggest that we're going to see dramatically shorter or longer days, nor that we've seen them already. You almost certainly have never noticed when there has been a change in the length of our day; nor will you notice if it happens in the future. Why am I so sure? Because these changes we're talking about are by an amount of the order of a thousandth of a second each time. I defy you to take note of such a change with any means available to you.

So how do we measure the length of a day, and then how it changes by these minuscule amounts? For a first pass, of course, we define a day as the time interval between two identical happenings: two successive sunrises or sunsets, for example. If you see two such, you measure the time between them and that's how long your day is. Still, to do this we need to be at some location with a clear view of the horizon to the east or the west. For many of us, that's not possible. So perhaps a better metric might be the time between two successive solar noons—that is, from when the sun is at its highest in the

sky today to when it is at its highest tomorrow. Though even that has its limitations. Perhaps it's an overcast day? And think about it, how do you pinpoint that precise moment when the sun is at its highest?

But let's say you do have a view of the horizons on a perfectly clear day; let's say you can tell with precision when the sun is at its peak. Taking an average through the year, we define this measure as the "mean solar day", assigning it 24 hours or 86,400 seconds.

But there are some caveats about this that are worth thinking through. Consider that sunrise, sunset and noon timings—as I explained in the previous two columns—do not depend solely on the Earth's rotation. Our planet's motion around the Sun also has some bearing on them. That's because our position in relation to the Sun is changing all the time. So because the Earth's axis is tilted, at any given spot on the Earth, you will see the Sun at a slightly different spot in the sky every day. On our floor at home, we have a starkly visual reminder of this. We've been marking where a particular shadow is cast

Sidereal time gives us a more accurate measure of how long it takes for Earth to rotate

at 9:10 every morning since the winter solstice. In just over a month, that shadow has plotted a deep, foot-long "C".

The upshot of all this is that using these solar phenomena—sunrise, noon, sunset—is not good enough, if we want to measure a day with any precision. So how can we measure how long a day is? That is, how do we measure how long the Earth takes to make precisely one rotation?

Part of the answer is to use not the Sun, but far more distant celestial objects, like stars. Stars are so far from us compared to the Sun that we can treat them as effectively fixed in relation to the Earth from day to day. We can't do that with the Sun. Strictly, nothing in the universe is "fixed"—every single object is moving in different ways. But astronomers find ways to define and use certain frames of reference, like distant stars. This gives us what is known as sidereal time.

It goes something like this. From a given location on Earth at night, look out at a given star. Let's say you choose Betelgeuse, the red giant in the constellation of Orion: bright and hard to miss. You note its celestial coordinates (one kind are called right ascension and declination, which I'll leave for another time). Make a precise note of the time of this observation.

The next night, you wait for Betelgeuse to reach that same spot in the sky—meaning the point at which it has the same celestial coordinates that we noted the previous night. Make a precise note of the time again. The difference between today's note and yesterday's is one day, in sidereal time. Again, there's more involved here, meaning a more accurate definition. But for now, this is a basic understanding of sidereal time.

Sidereal time gives us a more accurate measure of how long one rotation of the Earth takes. A sidereal day, then, is about 86,164 seconds, or 23 hours, 56 minutes and 4 seconds.

Note that that's about 3 minutes and 56 seconds less than the mean solar day. That's the difference I alluded to above, due to the Earth's orbit around the Sun. Over a year, because of the circuit it makes around the Sun, the Earth makes one extra rotation on its axis, for a total of 366—not 365. (Aside: To understand this, place two identical coins on a table, touching each other. Hold one down with a finger and rotate the other, gear-fashion and slowly, around the first, making sure they are touching all the time. Watch carefully. You'll find the moving coin makes not one, but two rotations around its centre.)

Incidentally, scientists also define a "stellar day", which is about 8.4 milliseconds (ms) longer than the sidereal day. I'll leave that for another stellar day.

Two final nuggets about all this and I shall call it a day.

One: over the last several hundred million years, the Earth's rotation has been slowing down, giving us longer days. Some fossil records suggest that 380 million years ago, there were about 400 days in a year; or just under 22 hours in a day. One possible explanation for this lengthening is that the cycle of tides is a slight but constant drag on the planet's rotation.

But two: last year, the Earth rotated faster than it has for many years. Consider this: until the end of 2019, the shortest solar day we'd had since 1973 was 5 July 2005, 1.0516 ms less than 86,400 seconds. But in 2020, we beat that record—wait for it—28 times. 2020's shortest day was 19 July, at 1.4602 ms less than 86,400 seconds.

But wait for it again: The average day in 2021 is expected to be about 0.14 ms shorter than we experienced in 2020.

It's really true. Never enough hours in a day. *Once a computer scientist, Dilip D'Souza now lives in Mumbai and writes for his dimers. His Twitter handle is @DeathEndsFun*

Extract of Audited Interim Consolidated Financial Results of Indus Towers Limited (formerly Bharti Infratel Limited) for the quarter and nine months ended December 31, 2020 prepared in accordance with the Ind AS

(in ₹ Million except per share data)

Particulars	Quarter ended	Nine months ended	Quarter ended
	December 31, 2020	December 31, 2020	December 31, 2019
	Audited	Audited	Audited
Total Income from operations	40,607	74,825	16,872
Profit before share of profit of joint venture and tax	9,621	20,949	5,535
Profit before tax for the period	12,382	29,612	9,387
Profit after tax for the period	9,791	24,153	7,987
Total Comprehensive Income for the period	9,787	24,143	7,986
Paid-up equity share capital (Face value ₹10 each)	26,949	26,949	18,496
Other equity	166,553	166,553	110,757
Earnings per share (Face value ₹10 each) (in ₹)			
Basic and diluted EPS			
i) Basic	4.941	12.189	4.319
ii) Diluted	4.941	12.188	4.319

Notes to accounts

1. The above financial results for the quarter and nine months ended December 31, 2020 have been reviewed by the Audit & Risk Management Committee in its meeting held on January 28, 2021 and approved by the Board of Directors in its meeting held on January 28, 2021.

2. The Joint venture of the company i.e. erstwhile Indus Towers Limited has merged into the Company w.e.f. November 19, 2020 (being the effective date of merger). This resulted in formation of a joint arrangement between the promoter groups i.e. Bharti Airtel Group and Vodafone Group. Further, the name of the Company has been changed from Bharti Infratel Limited to Indus Towers Limited w.e.f. December 10, 2020.

3. Key Numbers of Standalone Financial Statement as per Ind AS:

(in ₹ Million)

S.No.	Particulars	Quarter ended	Nine months ended	Quarter ended
		December 31, 2020	December 31, 2020	December 31, 2019
1.	Revenue from operations	40,598	74,800	16,659
2.	Profit before Tax	9,634	25,193	5,542
3.	Profit after Tax	7,043	19,734	4,141

4. The Board of Directors has declared 2nd interim dividend for the financial year 2020-21 of ₹17.82 per equity share in its meeting held today i.e. January 28, 2021. Further, 1st interim dividend of ₹2.30 per equity share declared for the financial year 2020-21 in its meeting held on July 27, 2020 and 3rd interim dividend of ₹4.10 per equity share for the financial year 2019-20 in its meeting held on April 23, 2020 has been paid subsequently.

5. The above is an extract of the detailed format of Quarterly Financial Results filed with the Stock Exchanges under Regulation 33 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015. The full formats of the Quarterly Financial Results are available on the Stock Exchange websites www.nseindia.com and www.bseindia.com and on the Company's website www.industowers.com.

Amrapali Group Housing Projects Ushering an Era of Hope and Cheers for the Home Buyers

ATTENTION !

HOME BUYERS OF AMRAPALI GROUP HOUSING PROJECTS

NOTICE TO FILL CUSTOMER DATA

➤ The Hon'ble Supreme Court appointed a Senior Advocate as Court Receiver and all projects of Amrapali Groups vests in him.

➤ The NBCC INDIA LTD., (a Navaratna Public Sector Undertaking-PSU) has been appointed as Project Consultant to complete the unfinished work left over by Amrapali Group within a stipulated time period.

➤ The finishing works of all Amrapali Group Residential Projects are already taken up by NBCC and speedy construction work has been initiated.

➤ For the interest of all Amrapali Home Buyers, NBCC India Ltd, has updated a list of tentative Construction Completion Schedule and Payment by Instalment Schedule as per construction completion periods, made available in the website, receiveramrapali.in

➤ In order to streamline the ACCOUNTS OF AMRAPALI HOMES BUYERS, the Office of the Court Receiver uploaded CUSTOMER DATA for the interest of the Home Buyers to verify their name in the Record of Amrapali and further to submit their purchase cost and all payments made to Amrapali. This is to accept all bonafides payments and check doubtful payments and adjustments.

➤ All updates relating to Amrapali Projects are made available in the website since 2019. Customer Data a digital form of communication for transparency made available in the Website since October-2020.

➤ While large number of Amrapali Home Buyers visited the website and submitted their Customer Data, still bulk of Home Buyers has not updated their data.

➤ This is to bring to the Attention of such Home Buyers, who may be UNAWARE of such website, namely, RECEIVERAMRAPALI.IN.

➤ It is urged ALL AMRAPALI HOME BUYERS must visit the website and update their CUSTOMER DATA. Furnishing details in Customer Data is MANDATORY and its non-compliance will disentitle them from all further consideration. Their cases will be reported to the Supreme Court for cancellation.

➤ For details of outstanding dues, Home Buyers must open the file named as, GUIDELINES ON CALCULATION OF SERVICE TAX AND OUTSTANDING DUES AND PROCEEDURE FOR DEPOSIT OF HOME LOAN AND OUTSTANDING DUES INTO UCO BANK ACCOUNT, available in the website.

➤ Filing Customer Data will be open for a limited period. Hurry to submit the Customer Data as early as possible.

➤ For further enquiry on issues relating to filing the CUSTOMER DATA, the Home Buyers may send their enquiry through RECEIVEROFFICE@GMAIL.COM.

➤ The Home Buyers may also record their enquiries via IVR No.9672590840.

पहले 13 दिनों में 11 राज्य 35 फीसदी से अधिक कार्यकर्ताओं को टीका देने में सफल

दिल्ली समेत छह राज्यों में टीकाकरण की रफ्तार धीमी

वायरस पर वार

नई दिल्ली | विशेष संवाददाता

कोरोना टीकाकरण के पहले 13 दिनों में 11 राज्य अपने 35 फीसदी या इससे अधिक स्वास्थ्य कार्यकर्ताओं को टीकाकरण करने में सफल रहे। वहीं झारखंड, उत्तराखंड और दिल्ली समेत छह राज्य ऐसे हैं जहां टीकाकरण मुश्किल से 20 फीसदी के करीब ही पहुंच पाया है। केंद्र ने इन राज्यों से टीकाकरण तेज करने का आग्रह किया है।

केंद्रीय स्वास्थ्य सचिव राजेश भूषण ने गुरुवार को कहा कि लक्ष्यदीप ने सबसे ज्यादा 83.4% स्वास्थ्य कार्यकर्ताओं का टीकाकरण करा लिया है। जबकि छह राज्यों झारखंड, दिल्ली, तमिलनाडु, उत्तराखंड, छत्तीसगढ़ तथा महाराष्ट्र में टीकाकरण 20 फीसदी के करीब ही है। वहीं आईसीएमआर के महानिदेशक डॉ. बलराम भागवत ने बताया कि कोवैक्सिन और कोविशिल्ड पर लिखी चेतावनी सही नहीं है। इसे हटाने के लिए दवा

नियामक को लक्ष्य दिया गया है। दोनो टीके रक्त पतला करने वाली दवा लेने वाले को ले सकते हैं। बता दें कि कोवैक्सिन और कोविशिल्ड पर चेतावनी पल्ला है कि इनका इस्तेमाल रक्त को पतला करने की दवा लेने वाले नहीं करें। भारत 26 जनवरी तक 20.3 लाख लोगों को खुरक देकर सबसे ज्यादा टीकाकरण करने वाला पांचवां देश बन गया।

मुफ्त इलाज नीति को मार्च तक अंतिम रूप दे सरकार : कोर्ट

नई दिल्ली | प्रमुख संवाददाता

उच्च न्यायालय ने गुरुवार को केंद्र सरकार से 31 मार्च, 2021 तक अनुवांशिक और दुर्लभ बीमारियों से पीड़ित मरीजों के निशुल्क इलाज के लिए नई नीति को मंजूरी देने का आदेश दिया है। इसके साथ ही न्यायालय ने सरकार को उस पोर्टल को भी शुरू करने का निर्देश दिया है। जिसके तहत दुर्लभ बीमारियों से पीड़ितों के इलाज के लिए महंगी दवाइयों के लिए फ्राउड फंडिंग यानी चंदा जुटाना है।

जस्टिस प्रतिभा एम. सिंह ने सरकार की ओर से दखिल हलफनामा पर विचार करते हुए यह आदेश दिया है। सरकार ने न्यायालय को बताया कि वह अनुवांशिक और दुर्लभ बीमारियों के इलाज के लिए राष्ट्रीय नीति-2020 के मसौदे को अंतिम रूप दिया जा रहा है।

इसमें वह भी कहा कि केंद्रीय स्वास्थ्य एवं परिवार कल्याण मंत्री से मंजूरी के बाद इसे सभी राज्यों, केंद्र शासित प्रदेशों और अन्य हित धारकों के साथ साझा किया गया ताकि सुझाव व आपत्ति पर विचार किया जा सके।

राष्ट्रपति के अभिभाषण का बहिष्कार करेंगे 19 दल

बजट सत्र आज से

नई दिल्ली | विशेष संवाददाता

संसद के बजट सत्र से पहले विपक्ष ने अपना एजेंडा साफ कर दिया है। कृषि कानूनों के खिलाफ किसानों के प्रति एकजुटता दिखाने के लिए राष्ट्रपति के अभिभाषण का बहिष्कार करने का फैसला किया है। राष्ट्रपति के अभिभाषण के बहिष्कार से साफ है कि सत्र के दौरान विपक्ष एकजुट होकर किसानों के मुद्दे पर सरकार को घेरगा।

विपक्षी दलों ने एक बयान जारी कर किसानों के आंदोलन को लेकर सरकार की नीयत पर सवाल उठाए हैं। विपक्षी दलों ने गणतंत्र दिवस पर किसानों की ट्रेक्टर परेड में हुई हिंसा पर अफसोस जताते हुए घायल पुलिसकर्मियों के जल्द स्वस्थ होने की कामना की है। साथ ही विपक्ष ने इस पूरी घटना की निष्पक्ष जांच कराने की भी मांग की है। ताकि हकीकत सामने आ सके। विपक्षी दलों ने प्रधानमंत्री नरेंद्र मोदी और भाजपा सरकार पर भी निशाना साधा।

टीका बर्बाद होने से बचाने के लिए दिशा-निर्देश जारी

नई दिल्ली। केंद्रीय स्वास्थ्य मंत्रालय ने राज्यों और केंद्र शासित प्रदेशों को कोविड-19 के टीकों की किसी भी तरह की बर्बादी नहीं देने को सुनिश्चित करने के लिए दिशा-निर्देश जारी किए हैं। मंत्रालय ने कहा है कि इस उद्देश्य (टीकों की बर्बादी नहीं होने देने) के लिए टीकाकरण केंद्रों को प्रत्येक दिन के लिए निर्धारित 100 लाभार्थियों के अतिरिक्त लाभार्थियों को जोड़ने की अनुमति दी गई है, बशर्ते कि निर्धारित लाभार्थी टीका लगवाने नहीं पहुंचें।

Dr. Rammanohar Lohia Avadh University, Ayodhya (U.P.)
